

## Hampden Veterinary Hospital

### Artificial Insemination (AI) Packages

There are two options available for Artificial Insemination - chilled semen or frozen semen. Chilled semen is generally more popular; and is a slightly cheaper package, whereas AI with frozen semen involves more scans and is not as straight forward, therefore the cost is greater.

Our packages are as follows:

#### PAY AS YOU GO (Chilled or Frozen Semen)

- All procedures are paid for as the cycle progresses.
- If the mare gets in foal first time and follows a regular cycle and all procedures are kept to a minimum, the approximate cost for this option is £610 inc VAT
- **THIS IS THE MINIMUM CHARGE FOR 1 CYCLE ONLY**

#### CHILLED SEMEN PACKAGE

Cost = £750 plus VAT which includes:

- All ultrasound scans up to 30 days of pregnancy.
- Endometrial swab, smears and lab fees.
- Pre and post breeding treatments including drugs.
- Insemination and microscopic examination of semen.
- Caslicks repair after covering.
- Twin reduction.
- Blood samples for progesterone, lab fee not included.
- Up to 3 inseminations if required.

#### **Not included in the package:**

- Sampling and lab fees for CEM, EVA and EIA.
- Treatment for metritis.
- Regumate, PRIDS or Receptal.
- Visit fees when less than 4 horses are attended.
- Boarding/Livery fees at either Barretstown Clinic or Radnage House Stud.
- Sedation.
- Any non-gynaecological or foal treatments.
- Maiden mares 13 years or more and other mares 16 years or more.
- Mares that have not had a live foal in the last 2 years, other than maidens.

#### FROZEN SEMEN PACKAGE

Cost = £1000 plus VAT to include: (see chilled AI package)

**On average it takes 3 cycles to get any mare in foal (UK statistics)**

Once you have decided which package to opt for, please sign the consent form attached and return to the equine office: [equine@hampdenvets.co.uk](mailto:equine@hampdenvets.co.uk)
